QR-PATROL

The best **real time** guard tour monitoring system

WHAT IS QR-PATROL?

QR Patrol is a modern real time solution using all the latest technologies to streamline and optimize organizations' guard tour activities. It is a sophisticated, yet user friendly application that guarantees:

- ✓ **Increased Performance**
- ✓ **Cost Savings**
- ✓ **Enhanced Worker Safety**
- ✓ **Improved Decision Making**
- ✓ **Transparency-Accountability**
- ✓ **Proving your work towards clients**

QR-Patrol – Key Features

2 way communication

Ability to send a message to your Guard(s) within the app.

Geofencing

Be informed of whether a checkpoint is scanned by the Guard within its pre defined area or not, so QR Codes cannot be copied.

Tracking

Get informed of a Guard's position without them needing to scan any tags/checkpoints.

Timeline

Timeline tab:
Instantly overview what's done and what needs to be done (view all scans recently performed/ to be performed according to your schedules)
Pending Actions tab: items that are pending some action (i.e. a missed scan of a checkpoint) to allow you to control them and take action.

End Client Login

Guarantee your services towards your clients! Provide your clients with their own credentials, to login and view events related to their sites in real time, 24/7!

Scheduled Client Email Reports

Automate the reporting process towards your clients. Customize the frequency to suit the client particular needs. Let them know they are protected at anytime!

Beacons

Define their transmit range as you wish to, use automatic scanning. Using beacons as checkpoints is great for vehicle external patrols and armed patrols.

Multiple SOS notifications

Choose between within app SOS, External BLE SOS button, or MANDOWN with clip wearable; all types trigger 3ple notifications: web app notification, email sending, SMSs.

Indoor location

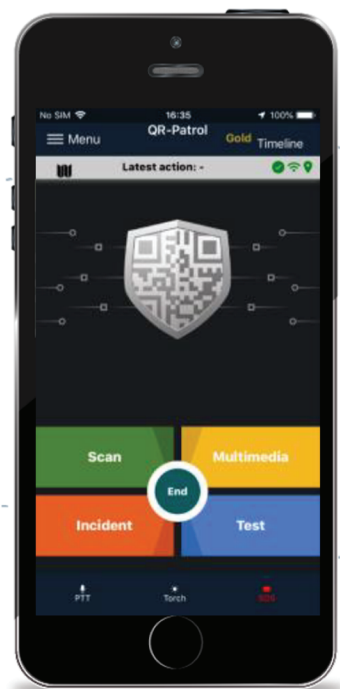

Working underground or in a basement? Use beacons to overcome physical restrictions (areas with no GPS coverage) and accurately locate guards with precision better than GPS!

Work offline

In case there is no internet connection, Guards can continue their patrol normally and send any type of event all data are stored locally within the phone app and will be submitted to the system with the correct information (timestamp, Guard position at the time of the event creation etc) once stable connectivity is found either via mobile data or Wi Fi.

* SOS (as long as there exists GSM coverage) can trigger SMS alerts

Fully Flexible Scheduling

Not all organizations have the same needs Support of fully customizable scheduling (users can create draft schedules, make changes, activate them, delete/cancel them (history is maintained), multiple Guards can be assigned to a schedule, daily/weekly/monthly/list view is available etc.

Advanced Reporting

Advanced reporting capabilities available

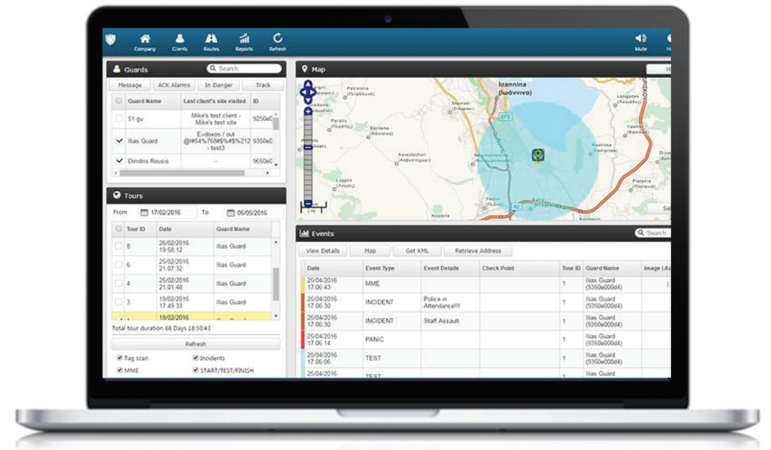

Multiple Access Levels

Ability to organize your account to branches & provide multiple users with their own credentials and respective access levels.

Custom maps upload

Ability to upload your own custom maps to the system and view your Guards actions on the Events Browser on top of your personal maps layers, thus having a much more personalized view.

Customized Translations

The system is already available in 18 languages; more languages or specific labelling (customized translation of QR Patrol features) can be added easily.

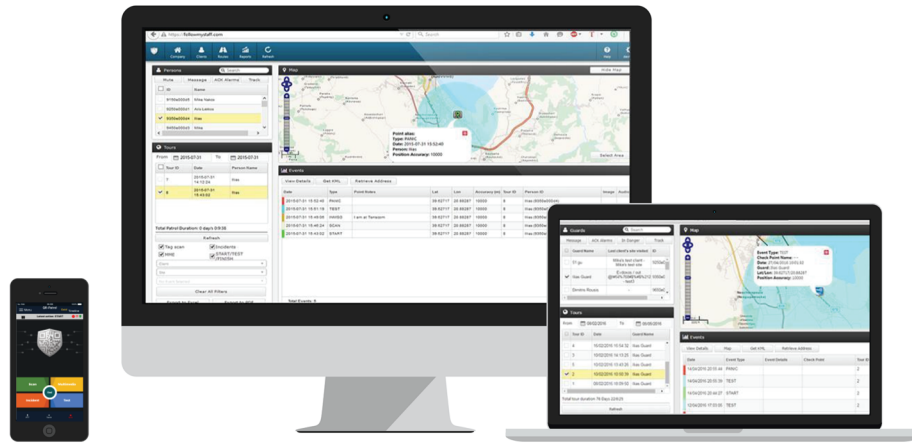

Wide Range Application

Supervise all of your territories

Multiple Devices Used

No device limit - Use **Anywhere** and **Everywhere**

Android
Application

iOS
Application

Web
Application

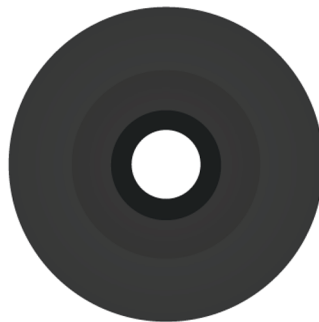

3Play Technology

We offer **3** types of **checkpoints**

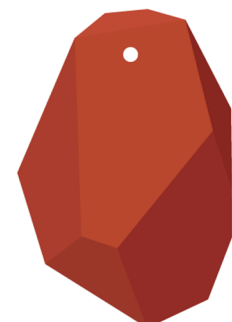

QR - CODE

Place QR-code on assets and scan with your smartphone.

NFC TAG

Just pass the smartphone over the NFC tag to scan it.

BEACON

Beacons enable remote verification of checkpoints.
