

**Innovation.  
Communication.  
Integration.**

## ABOUT US

Netstream was founded in 2001 to digitize the world of operations to increase the safety, efficiency, and sustainability of the operations that power our economy. We create technological DNA using your footprint to digitize the world of operations. We instituted the strong customer feedback loop which had served us so well at NIS: "obsess over customers."

Using this same method, we collected feedback on our first prototype and discovered a great untapped market opportunity that we were uniquely positioned to solve in the critical services arena. Our customers began asking us whether we could integrate with or offer our own hardware & software. It was clear there was a problem the market was trying to solve, and we sought a way to help. We started testing various technologies in the cloud and on premise.

We continued to iterate and improve on our offerings by relying on the customer-driven feedback loop that is the foundation of our product development. One such new product was the Push to Talk devices that we developed based on our customers' need to more easily see what happened in the time leading up to and immediately after an accident or near-miss or even a fatal crime.

## OUR VISION

To be the most customer-centric company locally and globally, providing intelligent IoT solutions by connecting things, data, and intelligence to solve business problems, allowing our customers to achieve efficiencies and create new business opportunities, and to be our customers trusted partner, providing total business support solutions, allowing them to focus on their core business.

## OUR MISSION

To improve communication, collaboration, and inventive change in the landscape of business support services and the outsourcing environment so that our customers can realize business value.

## CORPORATE SOCIAL RESPONSIBILITY

Our portfolio of solutions emphasizes a single point of contact for all aspects of delivery for one touch account management along with the best of breed technologies, easy billing and flexible financing options, through strategic business partnerships with a range of top international vendors, Netstream has the infrastructure to provide solutions that directly support the efficiency and cost effectiveness for our customers. We do this by making a substantial investment in local skills and emerging talents through various CSI channels.

## CORE VALUES:

Provide turnkey IT solutions for Southern African & international corporate and business customers wanting one stop supplier accountability, this total solutions approach enable customers to focus on their core business activities span across different economic sectors. To cater for diverse market requirements Netstream's capabilities span the full spectrum of IT hardware and software, beginning from integrated networking through to outsourced support and help desk services. Servicing the critical and emergency services arena our rapid repair and maintenance response times ensure that our equipment and products go way beyond the industry standard and vendor requirements.
